

Impact Report

27 September 2024

88* CUPS
SAVED

33.8 KG

CO2
REDUCED

By saving 88 disposable cups, you have reduced CO2 emissions by 33.8 kg, which is roughly the equivalent of driving a fuel-efficient car for about 280 km.

*44 reusable cups were used at the event, with each cup refilled at least once. This means 88 disposable cups were saved, as attendees would have otherwise used a new disposable cup for each refill.

Thank you for being part of our community of sustainability champions.
